

Timespace Low Bridge Alert

DRIVING SECURITY

Bridge Alert is a low bridge driver warning aid, integrated with the Timespace vehicle digital video recorders (DVRs). Audible and visual low bridge warnings are provided via a dash-board mounted device and the driver's CCTV monitor. Using the vehicle CCTV system's GPS device, and Timespace low-bridge data, Bridge Alert is a simple 'plug and play' installation, with free software upgrades.

LOW BRIDGE ALERT SYSTEM

Important Safety Notice

Bridge Alert is a low bridge, driver warning aid that relies on correct setup and valid GPS data to function correctly. Timespace does not and cannot warrant that Bridge Alert operates in a manner that is completely error-free nor that any information provided is always accurate. Calculation errors may occur when using GPS location data such as those caused by local environmental conditions and/or incomplete or incorrect data. **Bridge Alert is a driver aid, not a safety device.**

Operation

- Driver CCTV monitor warning
- Bridge Alert controller box (pictured)
- Flashing red LED warning
- Audible warning (sounder or spoken)
