Timespace LANLink

DRIVING SECURITY

LANLink provides live camera streaming, health reporting and remote footage review and download for Timespace Digital Video Recorders (DVRs) using WiFi or mobile network connections. LANLink is presented as a series of web pages viewed from any browser-capable device. Using simple LED icons and easy to navigate pages, LANLink allows operators to see the health of their entire fleet of DVRs.

Live camera streaming and CCTV health

Stream live cameras over 4G, monitor CCTV health and view daily camera snapshots for early identification of problems.

In-browser playback

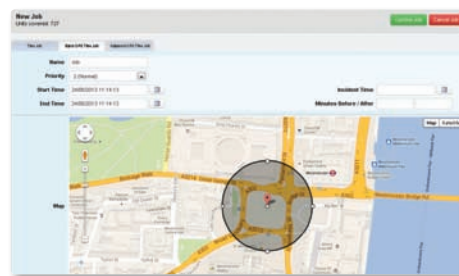

View recorded footage over 4G, and playback recorded footage in any web browser – no need for separate viewing software.

Live tracking and route information

Track vehicles using GPS, and obtain route information to aid in fleet management.

Downloads over 4G or WiFi

Download video footage based on **GPS Location** or **Date / Time**. Select single / multiple DVRs or the entire fleet to download automatically or write protect until the hard drive cartridge can be recovered.

CAN data

Live CAN data over 4G. Analyse vehicle engineering data in sequence with video footage. Schedule maintenance based on graphical trends, warning levels & email alerts.
